Paints for LEED rated buildings¹

PAINT & PRIMER

Engineer Plus Emulsions, are specially formulated to blend the functions of a primer with the finish coat. Two coats of Engineer Plus Interiors or Exteriors provide a sturdier coat than the conventional 'Primer + 2 Finish coats' system, bringing your vision to life in quick time with less effort.*

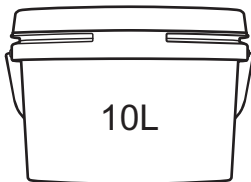

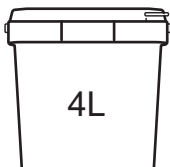

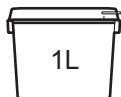

Engineer Plus Paints - Think Beautiful.

Every Engineer Plus Paints product works to transform beautiful thoughts into reality.

Everything about the paint, its application and finish is designed to be the 'Simple-Swift-Sure' way to make homes beautiful.

*When painting unpainted surfaces, light shade over previous dark shade, painting over oil based paint/distemper/ cement paint - a coat of Engineer Plus Interior/Exterior Wall Primer as applicable should be applied. Apply Engineer Plus Wall Primer over spots where spot putty/cement/crack filler is applied. Allow primer to dry for 3-4 hours before finish coat.

Engineer Plus Paints Interiors and Exteriors –
Available in 4 innovative, ergonomic packs
1L, 4L, 10L and 20L
