

WEATHER PROTECTION WITH FIBER REINFORCED

घर को रंगो से सजाए..
लिकेज प्रुफ बनाए...

Forms a barrier against water penetration and provides exceptional waterproofing.
Keep your walls fresh looking for long, come rain, sun or storm

700 + SHADES TO CHOOSE FROM - The technical superiority of Rainshield is further enhanced by the fact that it comes in more shades than your regular external paint catalogue shows you. Aesthetics is not compromised, and you can have that exact shade of flagstone grey or sunset yellow for your exterior walls. It is tough and pretty, and a comprehensive external wall colour and waterproofing solution.

STRUCTURAL PROTECTION

Higher longevity leading to better structural protection.

CRACK BRIDGING

Fiber reinforcement that offers crack bridging ability of up to 2 mm.

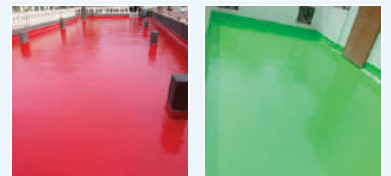

SUPERIOR CLEANABILITY

Ease in cleaning rust, dirt and bird droppings ensuring exteriors look fresh for long.

LOW VOC

Meets the LEED VOC criteria as per Indian Green Building Council.

FINAL WATERPROOF TERRACE

BLACK PAINT FOR WATERPROOFING

Resists wind

Driven rain, helps prevent water penetration into the substrate

Anti-carbonation

Effective carbon dioxide diffusion barrier protects embedded steel from corrosion

Waterproofing

Higher film thickness provides crack bridging ability, waterproofing properties

Flexibility

Flexible and covers hairline cracks (up to 2 mm) effectively, thus prevents ingress of water

Toughness

Tough film withstands wind driven rain Elastomeric High elasticity easily withstands stress caused by thermal expansion & contraction
